

Phenix Construction Technologies, Ahmedabad

Innovative construction ideas

There is more to construction than just bricks and mortar. With an unmitigated zeal to redefine the construction and infrastructure industries, Phenix, a subsidiary of M&B Engineering Ltd and part of the M&B Group, is a future-ready steel construction provider, specialising in PEBs (Pre-Engineered Buildings). The company has adopted advanced international technology coupled with sound inherent engineering practices to set new and innovative benchmarks in the Pre-Engineered Steel Building industry.

An ISO 9001 & OHSAS 18001 certified organisation, whose PEBs meet with all the regulated, locally and internationally observed codes of design and construction set by BIS, AWS, MBMA and AISC, Phenix also adheres to American Iron and Steel Institute (AISI) and Indian Standards (IS-800:2007, IS-801, IS-875, IS-1982).

Phenix PEBs are flexible for future expansion, dismantling and relocating. They are also maintenance-free since they offer superior-surface preparation and painting, as well as clean and high strength

material. What's more, these technical features are achievable without compromising on architecture or aesthetics.

Phenix's vast knowledge pool of experience and expertise in advanced manufacturing technology teams up with top-of-the-line software technology, provides end-to-end solutions and enables your business to leverage PEBs to their maximum benefit. To add to that, Phenix brings the vast experience of working in various industrial sectors to constantly add to its building functionality.
